Company

ADVANCED FREIGHT DYNAMICS LLC

File Code:

8143

Date:

10/15/2021 11:07 AM

The Permit Office of the Mississippi Department of Transportation has selected the route listed above based upon your application, potential contacts and the dimensions of your load. Please conduct a physical inspection of this route to determine if you can negotiate the sharp turns, steep grades, low wires, and traffic signals. You must advise our office in writing that you either can or cannot safely negotiate this route.

If you encounter any problem areas, please make note of them and provide us with a recommended solution.

Your permit request will be on hold until the Permit Office receives written notification concerning the acceptability for the route. For loads exceeding 16 ft. 7 in. in height, utility and railroad clearance letters are required in addition to this Route Survey Form. Loads exceeding 120 ft. 0 in. length require railroad clearance letters. When a superload permit is leaving the state at a border crossing, written certification from the adjacent state is required showing that the state will allow entrance. Upon receipt of written notification, the permit will be issued. The operator of the permitted vehicle must have a copy of the Route Survey in his/her possession while operating in Mississippi.

Customer requested amendments after the route has been accepted, are not allowed. A new application and route survey form must be completed with signatures, and a new permit will be issued.

Please scan and E-mail to the requesting permit writer and send a copy to mdotpermits@mdot.ms.gov

All pages of this document must be uploaded with signatures from the Route Inspector and/or Company Representative to the Route Surveys link available on the Company Dashboard.

Not all conditions are listed on the route survey. Please be aware that additional conditions can be added to your permit before it is approved. Please read the conditions before you purchase the permit.
